NR-LU-13 AND THEIR USE IN PRETARGETING METHODS

Inventor(s): Scott S. Graves et al. Serial No. 10/056,794 Docket No. 690022.527C2

Same frequencies, but matching with human sequences. Only one occurrence of Asp at poition 182 is found and no occurences of Cys at position 181.

Title: HUMANIZED ANTIBODIES THAT BIND TO THE ANTIGEN BOUND BY ANTIBODY  
NR-LU-13 AND THEIR USE IN PRETARGETING METHODS

Inventor(s): Scott S. Graves et al. Serial No. 10/056,794 Docket No. 690022.527C2

Position 50 is highly conserved in all the sequences, but proline can be exchanged by Ile or Leu. The framework used for the light chain (6fab) does have an Ile at this position. If this position is compared to other structures the backbone torsions are the same for structures with a Pro and an Ile at this position.

Position 50 (153 human lambda sequences)

Leu is seen in human sequences at this position, but never in murine sequences, for both human and murine Sequences P is the most frequently occurring residue at position 183.
